

# Final Cut Pro

## Course Outline

---

### **Section 1: Getting Started with Final Cut Pro**

- Learn how to set up your workspace (Library, Event)
- Import your video and audio files
- Organize your clips
- Create a new project
- Mark your favorite clips
- Put your clips in the editing timeline
- Move through your video

### **Section 2: Fixing Sounds & Colors, Making Changes**

- Learn how to add cool effects to your video
- Fix the color of your video to look its best
- Improve the sound quality with special tools
- Learn about linked video and audio
- Discover editing tricks like trimming and speeding up/slowing down clips

### **Section 3: Adding Extra Stuff & Sharing Your Video**

- Add more footage to your main video (B-Roll)
- Smoothly connect clips with transitions
- Put text on your video (titles)
- Export your finished video to share with others

### **4. Set up your cameras:**

- Combine different video clips from multiple cameras into one sequence.

### **5. Make sure everything sounds good:**

- Sync the audio from all your cameras so it sounds smooth and professional.

## **6. Edit your video:**

- Choose the best parts from each camera angle to create a dynamic and engaging video.

## **7. Polish your masterpiece:**

- Fine-tune your edit for perfect timing and transitions.

## **8. Add some extra flair:**

- Include additional video clips (called B-roll) to make your video even more interesting.

## **9. Create a 3D title:**

- Add a cool 3D title to your video to grab attention.

## **10. Make your title shine:**

- Customize the look and movement of your 3D title to match your video's style.

## **11. Share your creation:**

- Export your finished video in a format that everyone can watch (like H.264).

## **12. Bonus tip:**

- Use a preset to quickly export your video with the right settings.
